

**Guru Kashi  
University**

Indian Society for Technical Education (ISTE) and ICMQ India have signed an MOU to provide training related to quality, safety, environment and technology to Civil Engineering faculty, local professionals and students in the various engineering colleges. ICMQ India is a certification body exclusively operating in the Construction Sector.

Ministry of New & Renewable Energy (MNRE) has sponsored this project to ISTE for organizing one day Green Building Awareness programmes and Griha Trainers and Evaluators training programmes with the technical support of ICMQ Certification India Pvt. Ltd and in collaboration with GRIHA and TERI.

## ONE DAY GREEN BUILDING AWARENESS PROGRAMME

### Overview

The course is designed to sensitize and create awareness on Green buildings to students and teaching faculty of architecture and civil engineering, building professionals, including architects, consultants and builder groups.

The course objective is to inform participants on the most relevant aspects of Green buildings, including design, materials and construction technology and practices during the entire life cycle of a building.

It introduces the prevalent international and national rating systems and provides information on performance parameters that are used to evaluate greenness of buildings. Through lectures, case studies and audio-visual presentation, the programme is designed to effectively sensitize and create awareness on Green buildings to its participants.

### Is this training course for you?

Do you ask yourself some of these questions?

- What is a Green building and what are the benefits therein?
- How can I design and build a Green building? What elements should I consider in such a building?
- What are Green building rating systems and what are the parameters considered for rating?

Then this training course is for you!

### KEY SESSION TOPICS

- Overview of Green Buildings
- Green Building design
- Site planning
- Building envelope design
- Energy efficiency
- Water and Waste management
- Health and comfort through Green building
- Green materials
- Green construction technology
- Green construction site practices
- Case study of a LEED project in Europe
- Green Building operation and maintenance
- Energy management system (ISO 50001)
- Green building rating systems
- Introducing GRIHA

### Training Material

All participants will be given:

- a copy of the power point presentations of this course

### Target

Senior Students and faculty of architecture and civil engineering diploma and degree colleges, building professionals including architects and engineers, contractors and building project managers, building facility owners and government agencies

### BENEFIT:

#### What is in it for you?

By the end of the course you are expected to be equipped with:

- an understanding of the Green building design, materials and construction practices
- a knowledge about Green building rating systems.

### PARTICIPATION FEE:

Students	Rs.500.00
Teachers	Rs.750.00
Professional	Rs.1000.00

Bank draft / cheque in favour of "Guru Kashi University", payable at Talwandi Sabo, Bathinda.

### FEE INCLUDES:

- Training material ● tea/coffee ● lunch
- Certificate of participation
